DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Randall et al. (US 6,125,239) in view of Herrington et al. (US 5,189,764).

Randall teaches the claimed invention except for a ramp extending from the reclosable fastener and a lip on the cover. Randall instead teaches the container as having a lip 32. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the lip on the cover, since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art.

Herrington teaches it is known to provide a ramp extending from a reclosable fastener. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a ramp extending from a reclosable fastener. Doing so provides a indentation which allows for maintaining the container in a closed position until sufficient force is exerted for opening.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hupp (US 6,394,299) in view of Herrington.

Hupp teaches the claimed invention except for a ramp extending from the reclosable fastener.

Herrington teaches it is known to provide a ramp extending from a reclosable fastener.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a ramp extending from a reclosable fastener. Doing so provides

a indentation which allows for maintaining the container in a closed position until sufficient force is exerted for opening.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claim 18 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 11 of U.S. Patent No. 6,394,299 in view of Herrington. Hupp teaches the claimed invention except for a ramp extending from the reclosable fastener. Herrington teaches it is known to provide a ramp extending from a reclosable fastener. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a ramp extending from a reclosable fastener. Doing so

Art Unit: 3727

provides a indentation which allows for maintaining the container in a closed position until sufficient force is exerted for opening.

Response to Arguments

6. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hupp et al. is cited for its disclosure.

8. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

9. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number (703) 872-7306 on the date shown below:

Typed or printed name of person signing this certificate
